## Barbeque(BBQ) Weather

Author: Besu Lemma

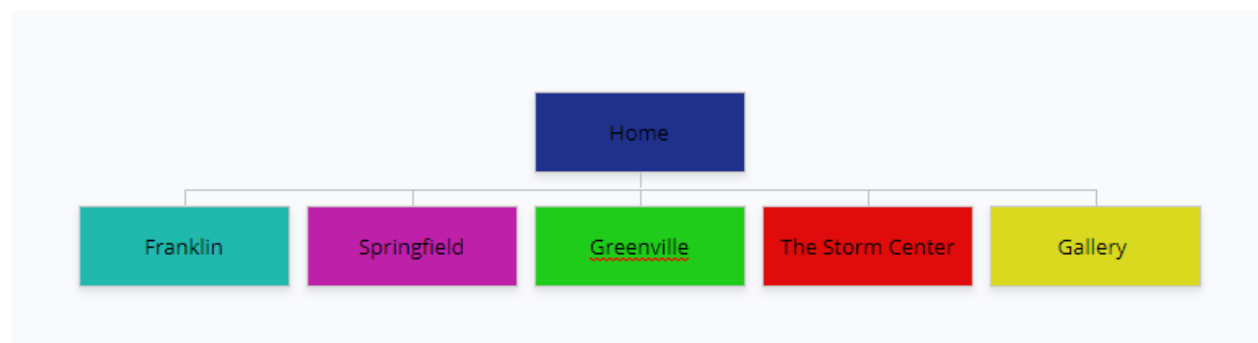

### Site Purpose

The purpose of the BBQ weather site is to give information about the weather in 3 specific cities: Franklin, Springfield, and Greenville. The homepage will show the current temperature of the current location and links that correspond to the temperature of the three different locations. It will also have a search bar to navigate any specific city.

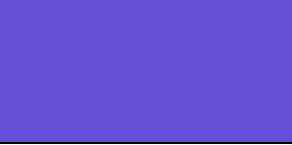

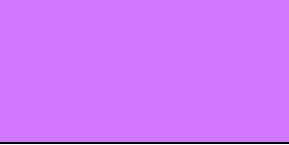

### Target Audience

Primary audience is college students in those 3 cities, ages 18-27. The site will be accessible in their laptops or phones. Most college students are not from the area and have little knowledge about the weather. They need easy access to the weather condition to dress accordingly. Anyone who is interested about the weather is also welcome to use the site.
